

# Equities & Fixed Income Post Trade

Nigel Evans. EMEA Post Trade Services

# Post Trade in Equities and Fixed Income

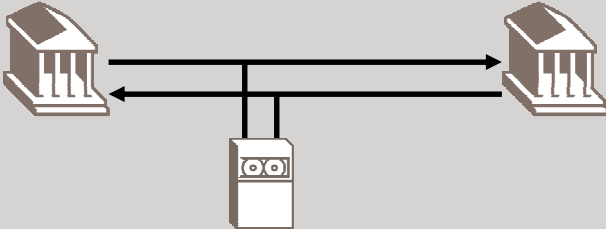

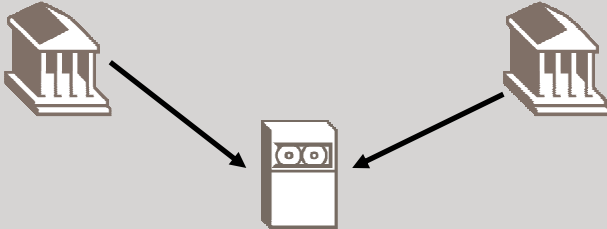

## Accord overview

- SWIFT's central confirmation matching service
- **Software as a Service**, covering 2 areas
  - Accord for Treasury (MT 3xx)
  - Accord for Securities (MT 515)
- Radically different models, one shared infrastructure

# Accord: a family of services

## Same infrastructure – different service structure

	Treasury	Securities
Flow model	<p>Messages exchanged between the parties, are <b>copied to Accord</b>.</p> 	<p>Both parties submit messages <b>directly to Accord</b>.</p> 
Choice	<p><b>Individual:</b> each party takes own decision as to how matching is done (Manually, on Accord, or on local application)</p>	<p><b>Collective:</b> both parties must be Accord users, to obtain a match.</p>
Reporting /integration	<p>Exclusively Real-Time, in pull mode</p> <ul style="list-style-type: none"> <li>• GUI for operators</li> <li>• InterAct based API, for integration</li> </ul>	<ul style="list-style-type: none"> <li>• Real time towards GUI</li> <li>• FIN-based reports at 15 minutes intervals for integration in back-office applications (push mode)</li> </ul>

# Message types Matched in Accord

--------	--------------------------------------

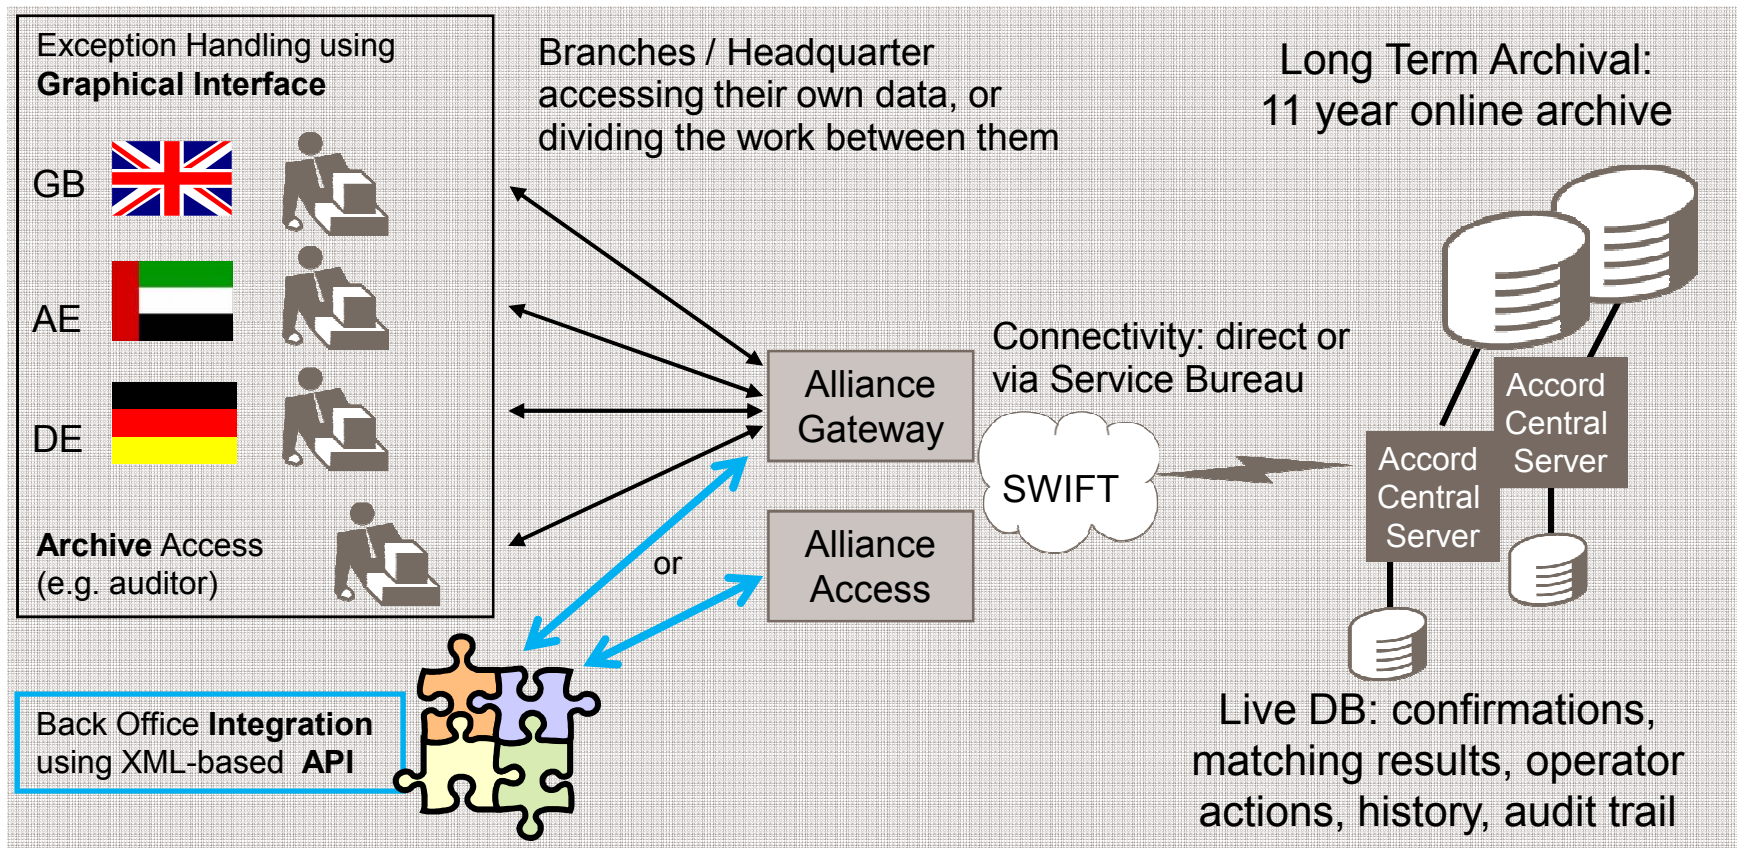

# Accord for Treasury

## Single-slide overview

# Accord for Treasury

## Accord from the customer's perspective

# Accord for Treasury

## Strengths: why do we have 470 customers? (1/2)

- **Complete outsourcing** to reduce both **COST & RISK**:
  - Installation, testing, upgrading, capacity planning, hardware/software/dbase management... SWIFT takes care.
  - Includes highly complex surprises: entity renames, mergers, global bank reorganisations
- ➔ **Low Total Cost of Ownership**
- **Operator efficiency**:
  - rich, well-organised, continuously updated toolkit for exception handling
  - Highly sophisticated, frequently tuned, shared set of matching rules to minimise frequency of spurious exceptions
  - Ease of **integration**, frequently off-the-shelf
- Truly **global** system – fully **scaleable** – **flexible deployment** (central, hubbed, follow-the-sun, mutual resiliency....)

# Accord for Treasury

## Strengths: why do we have 470 customers? (2/2)

- **Unparalleled Reliability, Security and Availability**
  - SWIFT taking full financial liability for correctness (R&L policy)
  - My match = your match when both using Accord
  - 100% fraud resistant (complete central 11y audit trail, database records fully shielded from operators)
- **Award winning 24x7 Customer Support**
  - in minutes, an expert can see a problem they way I see it
  - pro-active monitoring of efficient usage
- **Stable provider, capable of tackling root cause of STP gaps**
  - working with community to upgrade Standards, increase Standards know-how where required, create usage guidelines, coach developers, intervene with “offenders”.

# Accord for Securities

From problem statement to live service in 1 year

- Live since 18 May 2009
- Matching of MT 515 for Prime Broker versus Executing brokers, or between Executing brokers
- Radically different model:
  - Direct submission to Accord, no copies
  - Always with BOTH parties using Accord
  - Collective decision of community
  - No API, but FIN-based near-real-time status reporting (August 09)
  - GUI for smaller users / occasional usage
- Initially: top 10 Prime brokers/Executing Brokers; ramp up to include +/- 200 2<sup>nd</sup> tier brokers
- Also complemented with Long Term Archival (October 09)

# Accord for Securities

## Solution overview –Broker to Broker

1. Broker A trades with Broker B

2. Broker A copies trades + settlement info in MT 515

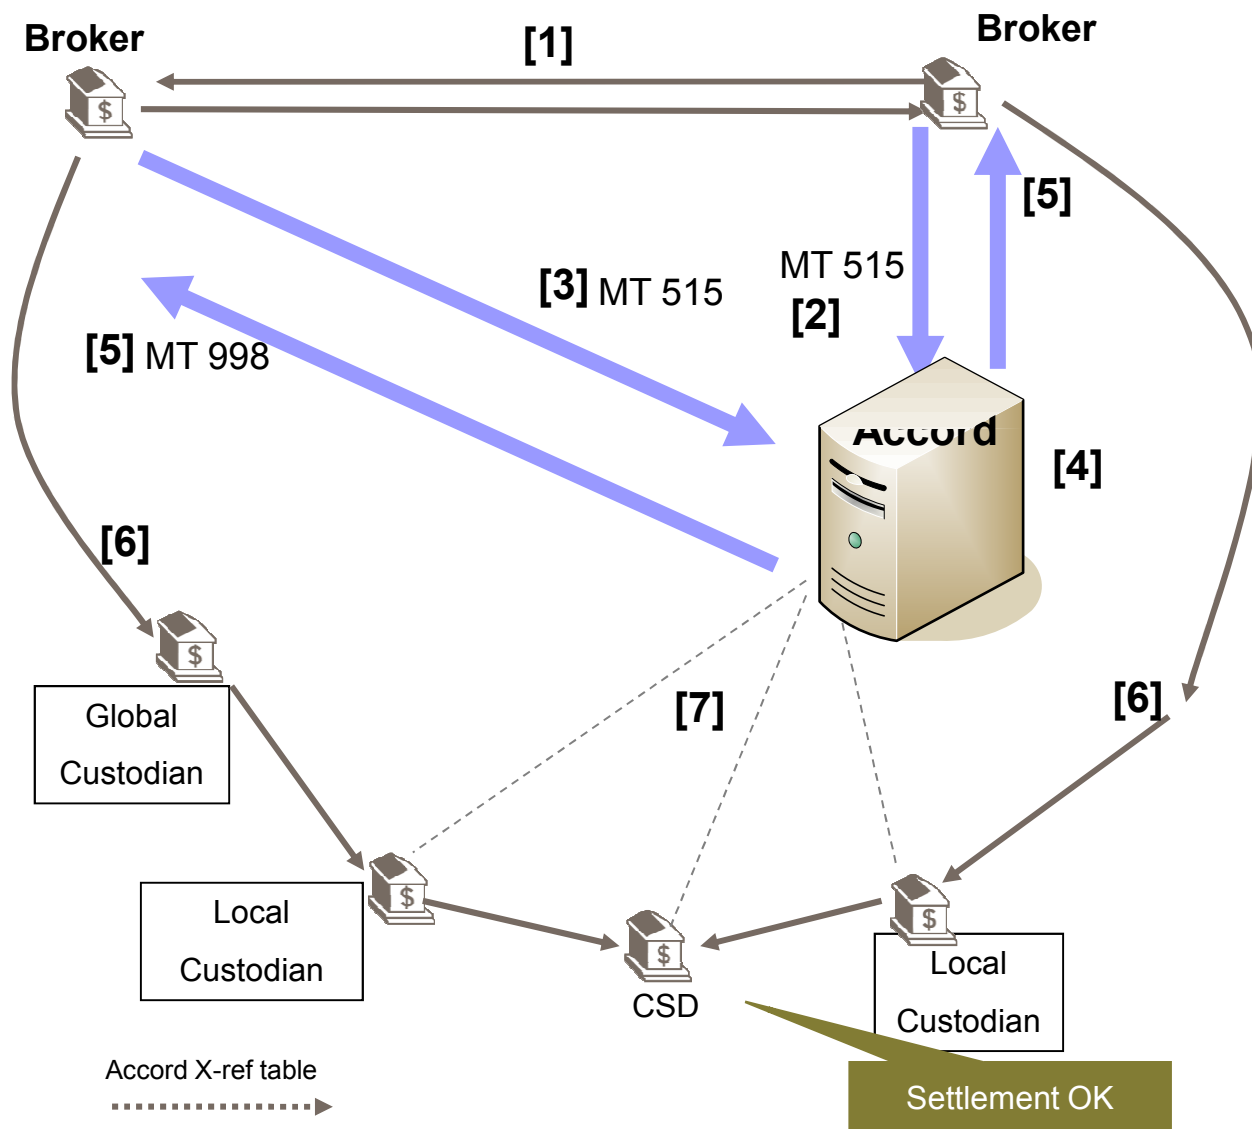

3. Broker B copies Trade & Settlement details in MT 515

4. Accord matches (MT 515) to (MT 515)

5. Accord sends match status updates via (MT998)

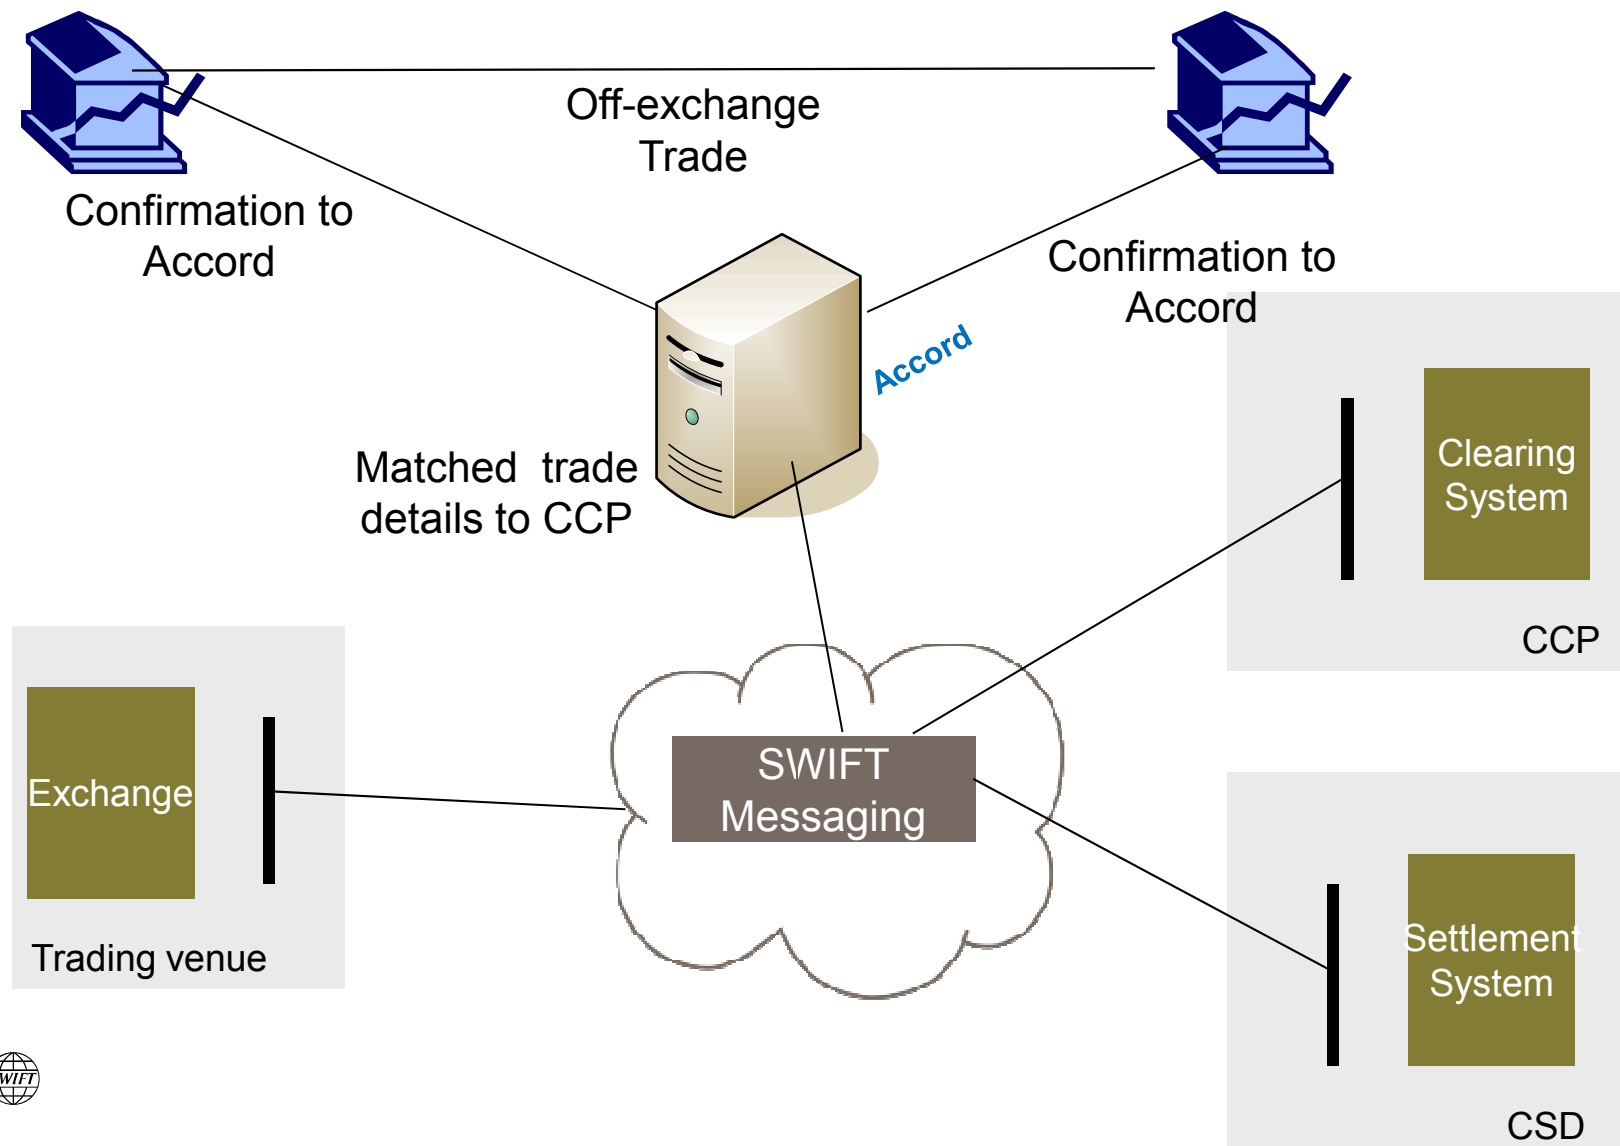

6. Brokers instruct settlements (MT 54x)

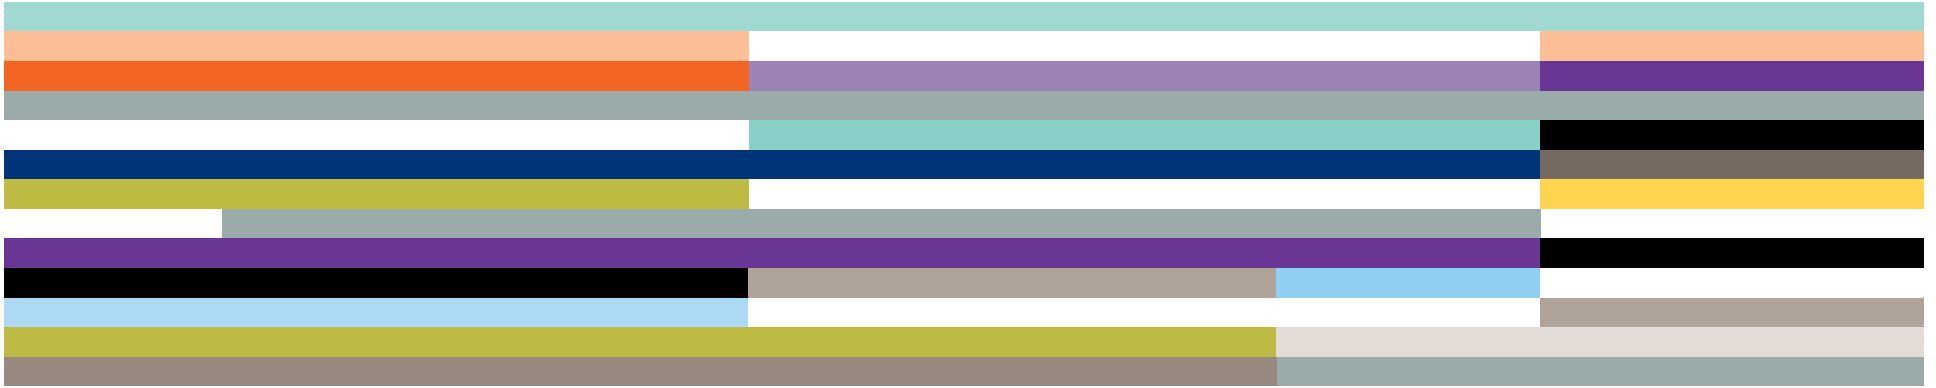

7. CSD agents' local code is x-ref to a BIC in Accord

# Accord for Securities Upcoming Development

## Feeding Central Counterparties

Thank you  
Mulțumesc
